Dear Sir/Madam,

My name is Amit Shrestha. I am applying for the position of React JS Developer that I found through internet. I identify and develop opportunities. I'm a nice fun and friendly person, I'm honest and punctual, I work well in a team but also on my own as I like to set myself goals which I will achieve, I have good listening and communication skills. I have a creative mind and am always up for new challenges.

I have worked on ward no 4 and study about the data flow from client to database via server. I do assist the colleague about the work on the bms.net web app for tax management of the government of entire municipality.

1. Assisting the staff about the database management is the tough job because they don't know what is happening. So they must be taught once in a while about database, forms and all links and routes to function properly of the app.

Later I join Municipality as Supervisor of Poor Family Identification and manage project till now. I present report to upper management about how people under my supervision are collecting data to store in database. Until now, we are able to manage about 13 wards data and analyzing them to provide results for future manipulation.

The benefits of this work include:

1. The people under the poor category got the first priority from the government itself.
2. Any program launched by the government to eradicate or decrease the poor percentage rate will first prioritize the poor then it goes on hierarchically,
3. This is done because every year the budget for the poor has been distributed haphazardly that government is not able to analyze whether poor has got the benefits.

Here, I am applying for the role of React/Node JS developer. I have had 1 and half year experienced on React JS. I am following the MERN stack process to build the product recently.

Some of the works I accomplished are:

1. Hotel square web app based on MERN.
2. Ecommerce site on working phase.
3. Some websites like ward no. 4, beach resort.

I am really grateful for all the opportunities I got through to develop all the skills I need in life. I hereby want you to know that I am very much fit for this role. I have done a lot of hard works to get to this level since intermediate level, bachelor and till eternity I will. I am really looking forward to get this opportunity and join the team. Hoping for the positive response.

With Regards,
Amit Shrestha
